Description

What is CBN (Cubic Boron Nitride)? CBN abrasive is a similar product to synthetic industrial diamonds.

CBN is composed of nitrogen and boron as very very hard crystals - second in hardness only to diamond. A single layer of CBN grit on the surface of a metal wheel can grind the hardest steel and last for many years.

Our electroplated CBN grinding wheels are machined from solid steel, electroplated with a layer of CBN grit and nickel plated.

A CBN wheel is far better suited for sharpening high speed steels and will withstand the friction from grinding with much less heat produced than with a diamond wheel.

Features

- 90 x 20 x 15.875mm (Diameter x Wide x Bore)
- CBN 140 for Carbide

Specifications

ORDER CODE	D115A
Type	CBN 140 Wheel
Grinding - Drill Bit Type	HSS
Sharpening Range (mm)	12 - 26
Suits Grinding Machine	SA-2500
