

TOOLMASTER SF-35M

Slapping File - Second Cut

TOOLMASTER SF-35M Slapping File - Second Cut

Description

An old-time secret for removing dents or smoothing body work on hand fabricated panels.

The serrated face works in two ways:

1. It shrinks the stretched metal, and highlights high/low spots that require hammer and dolly work.
2. When used as a slapping hammer, with a dolly, files shrink metal to remove high spots. The files can also be used to remove metal

Features

- Used on car panels for restoration repairs
- 2nd cut medium file
- PVC handle for better grip

Specifications

ORDER CODE	F160
MODEL	SF-35M
Product Type	Slapping File -Second Cut
