OPTIMUM Opti-Turn Bench Lathe TU-2506V

Description

This compact lathe of very modern design has many convenient facilities ideal for the enthusiastic model engineer for small component manufacturer. A very rigid induction hardened cast iron bed with ground slideways gives a high level of precision turning. The lathe capacity is 550mm between the centres and 250mm swing over the bed. This model has a 1200W DC high power motor providing smooth running. A standard feature is the full electronic speed control dial with digital read-out display for the spindle speed.

Other very useful features included are longitudinal power feed, quick lock tailstock and both metric and imperial thread cutting, ranging from 8-56 tpi or 0.2-4mm. Also included are a 4-way indexing tool post with 10mm tool shank capacity, fine adjustment on the tailstock for taper turning and the rear splash guard. A 125mm 3-jaw chuck with reverse jaws is also supplied, the headstock spindle being through bored to 26mm diameter. There are many additional options available including a milling head (BF-16AV) or (BF-20AV) to turn this machine into a very capable all round machining centre.

Features

- Electronic infinitely variable speed 150-2500rpm
- Easy to read digital readout speed display
- Ribbed prism bed made of grey cast iron
- Inductively hardened and ground bed guideways
- Spindle nose accuracy 0.009mm
- 3 Jaw chuck running accuracy 0.04mm
- Forward & reverse spindle direction switch
- Automatic longitudinal feed
- Metric & Imperial thread cutting
- Enclosed feed and threading gearbox
- Cross slide & bed length are designed to fit Optimum DRO scales

Includes

- Change gears for metric & Imperial thread cutting
- Chuck guard
- Toolpost guard
- Dead Centre
- 3-jaw chuck with reversible jaws
- Swarf tray
- Rear splash guard
