

TOOLMASTER BC-4

Precision Boring Head

Ø100mm Head

TOOLMASTER Precision Boring Head BC-4

Close up

Description

Sturdy boring head suitable for roughing & finishing work. The 100mm head uses the same arbors as the 50 and 75mm heads and makes for an easy and cost efficient addition to the workshop.

Fitted with 2 vertical and one cross hole for the boring bars

The boring head allows the boring bar to be adjusted at a right angle to the spindle axis. This feature makes it possible to position the boring cutter accurately to bore holes of varying diameters.

The adjusting screw is hardened & ground and is a non reflecting satin chrome. The reading dial allows for adjustments of 0.01mm on the tool slide and is a direct reading.

Features

- Wide range of boring diameters and depths
- Calibrated micro adjusting screw via a hexagon key.
- 1-1/2" x 18TPI threaded body to mount optional arbors
- Accepts 25mm diameter boring bars
- Includes storage case for protection
