

TOOLMASTER

Double End Threaded Clamp Stud

M10 x 75mm Long

TOOLMASTER Double End Threaded Clamp Stud

Description

Double-end threaded clamp studs are commonly used on drilling and milling slotted worktables to securely clamp vices, rotary tables, dividing heads, and parts for machining. They work well with flanged and tee nuts, allowing for quick adjustments.

Features

- Heat Treated Steel
- Black Oxide Finish
- Rolled threads
- HRC 34°
- Supplied in packet of 2
