Description

With a 150W motor the AP-12 is great for home or lite industrial workshops. The air passes through a 2 stage filter system, with the pleated pre-filter firstly captures 98% of all particles at 5 microns in size and 85% of all particles 1 micron in size when it passes through the second stage filter.

The remote control unit has three settings for the motor speed (High-1044CFM @ 69dB, Medium-702CFM @ 67dB, Low-556CFM @ 62dB) and three different time settings of 1 hour, 2 hours and 4 hours, which can be used to clear the workshop after work has finished for the day.
