Description

Manufactured in Taiwan

This heavy-duty chisel morticer handles up to 25mm in softwood, featuring a cast iron frame and a fabricated steel stand. A single handwheel controls both longitudinal and lateral table movements, eliminating table "skewing," a common issue in other models. The material clamp adjusts for various workpiece widths, while the multi-position down-feed lever ensures comfortable operation with optimal leverage.

A gas strut in the rear column enables smooth headstock travel and allows "parking" at any position. The large cast iron table includes a tall rear fence and an easily adjustable depth stop for consistent accuracy. Designed for busy workshops, this reliable machine delivers years of precise, trouble-free performance.
